June 2, 2015

The Honorable Mitch McConnell Majority Leader United States Senate Washington, DC 20510

Dear Majority Leader McConnell:

We are writing as members of the American Alliance for Innovation (AAI) to strongly urge you to bring S.697, the "Frank R. Lautenberg Chemical Safety for the 21st Century Act," to the Senate floor for a vote prior to the August recess.

The AAI is an alliance of trade associations representing businesses both large and small from across the economy. We represent many major sectors of our economy—all along the chemicals value chain—including aerospace, agriculture, apparel, automotive, building and construction materials, chemical and raw material production, consumer and industrial goods, distribution, electronics, energy, equipment manufacturers, food and grocery, footwear, healthcare products and medical technology, information technology, mining and metals, paper products, plastics, retail, storage, and travel goods.

Passage of S.697 is critical to further ensuring the safe use of chemicals, while encouraging innovation and the development of new products, and maintaining America's ability to compete in today's global marketplace.

Improving the regulation of chemicals used in commerce is a top priority for each of our organizations, since it will have a profound impact on each of our industries, the products that we make and/or the services we provide, and the millions of workers we represent.

S.697 is a balanced compromise, passed out of the U.S. Senate Committee on Environment and Public Works on a strong bipartisan vote of 15-5, which presents the Senate an historic opportunity to pass the first successful reform of a major environmental law since the Clean Air Act Amendments of 1990. The bill has the support of 20 Democratic and 20 Republican cosponsors. We believe S.697 deserves consideration before the full Senate and ask that you consider it for floor action in June or July.

Sincerely,
