

(b)(7)(C), (b)(7)(D)

Ok I'm going to need something further on this one even if its just a profiler's opinion on Payne. Especially before I take this one to my staff and their families.

Is the opinion that Payne would consider taking a non Law Enforcement employee?

Would he consider taking anyone other than my manager (or his wife who is a BLM manager) or myself?

This is the most worrisome piece of Intel you have provided me for 3 reasons.

1- [REDACTED] seems pretty good, it gave us early warning about taking a government facility which was believed to be the Frenchglen facility at the time but our HQ was also mentioned.

2- I've not seen Payne in any of the regular or social media feeds nor have his Facebook sites been active.

Both of these factors I personally noted at the time of the take over. In addition the Intel I've seen on Payne leads me to a personal belief he would be capable of attempting something like this.

3- I feel tensions are rising at the compound. The tactics employed so far are making them desperate (which is a good thing) and I heard about the fight this evening at the compound where Blaine Cooper hit the guy hard enough he had to go to the hospital.

Please expand on this warning and give me something more than this because compared to the responding "feds" my staff and their families are soft targets and have already been victimized once when it wasn't expected.

I will ratchet up my personal awareness level but my concern falls to my employees and families.

(b)(7)(C)
