Thanks [REDACTED]

Low enough resolution that the buildings can be seen would be great. If you need to send them in batches that would work.

There is a lot going on behind the scenes and what you see on the media is very controlled. The FBI is not going to let these guys become martyrs so they have good control of the situation. Just understand that everyone out there will be going to jail when this is over. The open access is actually paying off on what we are learning and what the ultimate charges will be.

Thanks for looking through your photos and I appreciate your help with this. No refuge employee or their families are in Harney County and we are all safe.

Enjoy the peacefulness of (b)(6)
Bosque.
