Dear President Reagan:

As a resident of Pitman, N. J. who lives within $\frac{1}{2}$ mile of the LiPari Landfill (Designated As The #1 Worst Toxic Landfill In The U.S.), we would like to express our concern and outrage as to the proposed clean-up. The EPA has proposed several clean-up alternatives -- all of which are Jokes! The only acceptable plan is Total Removal and Processing of the Chemicals. Obviously the EPA thinks they are dealing with ignorant hicks! We can tell you that is not true. The First part of the clean-up was encapsulation. That was a dismal failure -- 2,500 Gals. of contaminated liquid is still leaking from the landfill.

Our Concerns Are:

- #1. Our families health and well being
- #2. The quality of the drinking water
- #3. Air quality
- #4. Property Values

We would like to see the Superfund Money used to clean-up this mess. Being designated #1 should mean priority -- not procrastination. We have been living with this problem since the 60's. ENOUGH IS ENOUGH!!

We encourage you to do whatever you can to help with this problem.

No, we plead, for you to do what you can. This is not just a local problem, but one of the most important issues to be dealt with in our lifetimes. We need your help and support.

We would appreciate your response on how you plan to help with our problem.

Sincerely,

JEFFERY AND NOREEN WILLIAMS
