Subject:
Trillium status update and discussion

Summary:

-Mr. Little Asked about response to their last submittal and mentioned that Sheila replied that the Corps' response would be in writing. I stated that is correct.
-Mr. Little also stated that they were just wondering what the response would be as they are reluctant to go down any given path until they know what is acceptable. I reiterated that they would receive our response in writing, as Sheila has stated, and that was the last direction I received from Sheila.
-He stated that Estrella Campellone mentioned that there was some sort of re-org happening in the Corps and wondered if I could share anything as it relates to the re-org, such as if everyone is going to be doing the same type of review that they have been doing on their project. I replied that as of now, we were told that our current workload and assignments would not change.
-Mr. Little stated he had questions about ledgers and making sure we have matching data. He asked if he should call Danielle directly. I stated that this is also something that should be coordinated through Sheila. Sheila is the project manager.
-He asked if I was still the chair for SEAL Trust. I replied that I was. He stated he was just curious.
