Thank you Nancy. Here's one more for your review please:

12/19/2017 4:16 PM Consolidated Purdue Private 10/19/2017 2:52 PM 18 EPA Pesticide Enforcement Cooperative Agreements (E) Cooperative Agreement

The work proposed by the Office of Indiana State Chemist housed at Purdue University is to protect the surface/ground waters, agricultural workers, handlers, and endangered species from pesticide. Additional benefits include reduced exposure to toxic pesticides, ensure cleaner waters, and foster improved pesticide compliance. This will be done through the implementation of the state/federal pesticide regulatory and enforcement programs.

Thanks John.

These seem fine to me. I tried to catch you on the line but then you moved in and out too quickly. **Ex. 6 - Personal Privacy**
