Subject: Colorado's March 2018 Sale

Hi July & Jennifer,

It doesn't look like Colorado will have a March 2018 Lease Sale. We don't have any new EOIs for the field offices in that rotation and we don't have any old deferrals that can be brought forward at this time.

I have a few different examples of memos sent to WO before for similar situations, but am not sure which to follow if any of them. Could you please let me know what template to use for this? Or if your office needs other information as well.

Thanks!

Hi Rachel,

We've been seeing some push back from the Main Interior, regarding lease sale postponements since we received the WEA litigation. For example, Nevada sent a lease sale postponement memo for their Sept 2017 sale because they did not receive any EOIs or presale offers, but the WO would not sign off on it. After discussions, NV sent another memo to withdraw their request, stating they would move parcels scheduled from another District so they could continue to hold their scheduled sale.

I just wanted to give you a heads up from what July and I are seeing from the Main Interior. Would it be possible to move some parcels currently scheduled for your December 2017 lease sale, so your office could continue to hold a March 2018 lease sale?

If you don't think it's possible to move some parcels around, please use this template. I am also attaching the NV memos, just in case it can help you.

I hope your day is going well.

Jennifer

I would echo what Jennifer said below. I talked to Rachel about it in person yesterday. In addition to the option of looking at parcels for the Dec 2017 sale, I suggest you also look at EOIs for other districts even if it's not part of the normal rotational schedule.
