Attachments: Planning GHG Guidance (1.47 MB)

Jason;

For the near term period (2017 thru 2020), we are good as we have received guidance from Corporate SHE on the amount of money Kearn (and other assets) will incur under the new policy.

For the longer term period (2021+), we do not yet know how it should be incorporated into the model. Last year, the guidance resulted in massive GHG costs in the out years so alternate methodology was applied. I suspect something similar will be required this year. I've sent a note to Corporate SHE on this topic (see attached). I should have cc'd you guys on the note I sent because as the owners of the model, I believe you guys (Ed?) will be on point to make the update. I think a meeting with SHE would be a good next step and we are certainly willing to support where we can.

Cheers,

Dan Hoy, P.Eng

Anna/Dan.
Fyi

On the "EMDC" side we are working to understand the attached changes impacting GHG treatment. Has there been any discussion from the Kearn Asset / EMPC Planning on how to incorporate GHG into the Kearn model?
