

Message from the Director of OARM Cincinnati on COVID-19

Dear Colleagues,

This message is to update you on the other employee who was a presumptive positive case of COVID-19 within our own employee community at the AWBERC Facility in Cincinnati. The employee was tested, and the results were NEGATIVE for COVID-19.

Again, I strongly encourage all AWBERC Facility personnel to review the COVID-19 guidance and facts available. Education and prevention are our strongest tools against infection. Stay informed by visiting the [CDC's COVID-19 website](#) or our [new COVID-19 intranet page](#) frequently to get the latest news for yourself and your loved ones. Continue to practice good personal health habits, avoid unnecessary travel and practice social distancing.

Please remember that your health and well-being are paramount. Do not hesitate to talk with your supervisor as soon—and as often—as needed. These are difficult times. Please take care of yourself and your family.

Vique Caro
Office Director
Office of Administration and Resources Management Cincinnati
