## RACE TO 218: HOUSE CLIMATE BILL

E&E Daily analyzed the positions of the 434 House lawmakers expected to debate a comprehensive climate bill this summer. Projections are for final passage of H.R. 2454, American Clean Energy and Security Act. Positions outlined here are based on interviews with congressmen, plus dozens of Democratic and Republican sources, industry and environmental groups. It also factors in sponsorships of previous cap-and-trade bills, signature on Democratic leadership's 2008 global warming principles and a 2007 House floor vote on climate change. E&E will update this breakdown as the debate unfolds.
